Subject: Microsoft Settlement

I oppose the proposed settlement.

Microsoft should be tried under the rico statutes - they act like the mafia.

Their proposal to give away computers to scholls is ludicrous - it would be a marketting enhancement not a punishment.

Microsoft is stifling growth in the computer industry.
They are too big - they have enough power to kill any competitor.
There should be a stripped down featureless version of the OS.

It should be like buying a car. If I want to NOT buy your overpriced crappy stereo then I should be able to buy a stripped down car and put the money toward a stereo that I prefer. I should not be forced to accept all of microsofts 'features'.
